

Magnüs

DH10LED

Biological Microscope
(Multi-observer)

With the technical break through of Magnus microscopes, humanized interactive discussion on science research, pathology and education is available. With excellent optical system and ergonomic design, DH10LED is the best microscope for life science research, such as cytology, parasitology, oncology, immunology, histopathology etc.

DH10LED MULTI HEAD BIOLOGICAL MICROSCOPE

PARTS	DESCRIPTION	Quantity
Optical System	Infinity corrected Optical System	
Eyeiece	PL10X/22mm, diopter adjustable	20
Viewing Head	30° inclined gemel trinocular head 360° rotating (infinity) ,inter-pupillary range:54~75mm; Diopter adjustment ± 5.B:T=0:100 or 50:50	1
	30° inclined, infinite gemel binocular head, Inverted image interpupillary adjustable distance: 54~75mm,"	5
	30° inclined, infinite gemel binocular head, Erect image interpupillary adjustable distance: 54~75mm,"	4
Objective	Plan achromatic objective 4X/0.10 WD=15.000mm (infinity)	1
	Plan achromatic objective 10X/0.25 WD=10.80mm (infinity)	1
	Plan achromatic objective 20X/0.40 WD=1.50mm (infinity)	1
	Plan achromatic objective 40X/0.65 WD=0.80mm (infinity)	1
	Plan achromatic objective 100X/1.25 WD=0.21mm (infinity)	1
Nosepiece	Reversed quintuple nosepiece	1
Body	Coaxial coarse and fine adjusting system, with tightness adjustment and upper limited, coarse adjustment range 30mm, fine adjustment precision:0.002mm	1
Stage	187*166mm double layer wire driven mechanical stage, moving range 88*55mm, precision:0.1mm	1
Condenser	NA1.2/0.22 swing out achromatic condenser with marked iris diaphragm	1
Illuminator	10W LED lamp house	1
	10W LED	1
Middle module block	Middle Module with LED cursor. Cursor can be switched with Red/Green/Blue colors and tension adjustment. Left and right can be choiced.	5
Side module	Side module with link rod and stands	5
Stand	Stand group	1
Others	Spanner M4	1
Packing	Spange with carton
