

Refrigerated Centrifuges

4" Alphanumeric LCD display

Bi-directional encoder for setting

CPR-30 Plus

C-23 Plus

Salient Features:

- Choice of more than 14 models
- Max. speed: 20,000 RPM
- Microprocessor Models available for fast and accurate setting and reproducibility of run parameters
- User-friendly microprocessor control
- Menu driven ten-programme memory
- Pre setting of speed, temperature and time
- Precise speed control and reproducibility
- Unique safety rotor identification system
- Choice of 9 acceleration and 9 deceleration profiles and coasting.
- Brushless induction motor, practically maintenance free
- Safety lid interlock to prevent cover opening during centrifugation of fluid temperature
- Can centrifuge small volumes upto 0.4 ml
- Swing out/ Angle rotors available with different tube capacity
- lowest temperature -8°C
- Tube size from 0.2 ml to 1000 ml
- No. of tubes from 4 to 108 (depending on volumes)
